OMNOVA Laminates Chemical & Disinfection Resistance

Subject:

Guidance for Disinfection of Paper, 2D and 3D Laminates, including **Matte Luxe™** 2D and 3D, and **surf(x)®** 3D Laminates

Disinfectant Use:

A clean surface is more important now than ever. Substrates that can be repeatedly cleaned to combat ongoing exposure to pathogens is critical. A stringent program of cleaning and disinfecting has been proven to reduce the incidence of infectious diseases. In laboratory testing using the ASTM D3450 test method, our Laminates were shown to have no discoloration or damage to the finish when repeatedly cleaned and disinfected with the following cleaners and disinfectants listed on pages 2 and 3.

The EPA published a list of disinfectants that meet its criteria for use against SARS-CoV-2, the novel coronavirus that causes COVID-19. OMNOVA[®] has tested disinfectants that are approved for use against SARS-CoV-2 on its Laminates. Those approved for use against SARS-CoV-2 are in **blue**, bolded font on the following page. For general product cleanability information, please see Product Information Sheets.

Please see [Pages 2 and 3](#) for full list of recommended disinfectants.
